Processing Multiple Prescriptions

If a user has submitted an order with multiple prescriptions, each different prescription will be shown on its own tab below the order number.

Click on each tab to review the individual prescription details and confirm what is required.

Follow the steps on the following slides for each particular type of script in order to confirm and finalise for payment.

If a prescription cannot be dispensed, simply leave the **Price** and **Qty** fields empty, and the customer will not be charged for the item.

Requesting Delivery

You will receive a notification when the customer has paid through their app. Then all you need to do is click **Request Delivery** and dispense the items ready to be picked up.

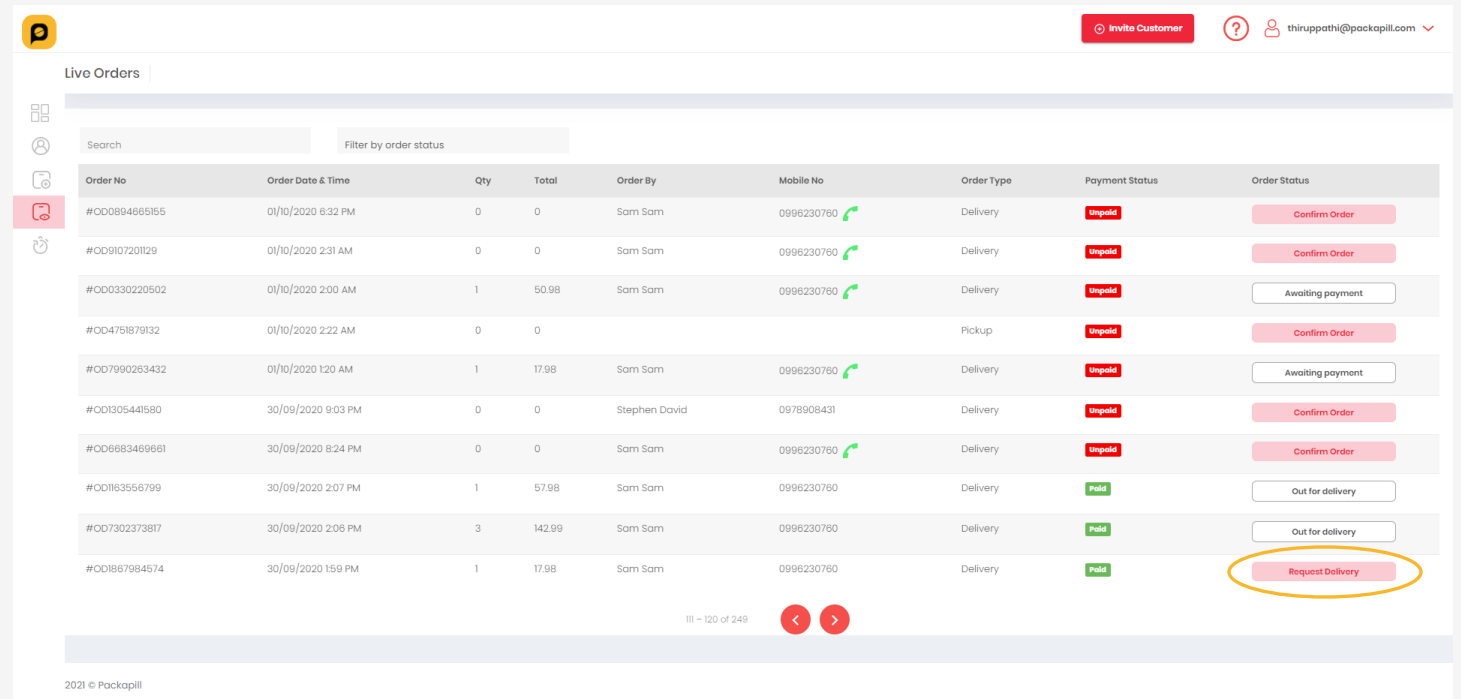

Packapill will dispatch a courier and the order status will update to **Courier Assigned**.

When the courier arrives, authenticate the order by verifying the customer's First Name and Delivery Address.

Hand over the order to the courier and click **Courier Arrived**. The order status will update to **Out for delivery**.

The order is now away! If the order was for a paper prescription the courier will collect the paper prescription from the customer and drop it back at the pharmacy.

Repeats will be retained at the pharmacy by default and the order status will update to **Order completed** upon completion of delivery.

The screenshot shows the 'Live Orders' dashboard in the Packapill app. At the top right, there is a red 'Invite Customer' button, a help icon, and a user profile for 'thirupathi@packapill.com'. The main area contains a table of live orders with columns for Order No, Order Date & Time, Qty, Total, Order By, Mobile No, Order Type, Payment Status, and Order Status. The table lists 10 orders. The last order, #OD1867984574, is highlighted with a yellow circle around its 'Request Delivery' button. The bottom of the screen shows a pagination bar with '11 - 120 of 249' and navigation arrows.

Search Customer List

1. Search the customer list by name, mobile or email address to find the right customer.
Click on the **Create Order** button next to the customer who you wish to create an order for.

NB: If the customer does not yet have an account in the system click **Add Customer** and follow the steps on the next page.

The screenshot shows the 'Customers List' interface in the Packapill system. At the top right, there are buttons for 'Invite Customer', 'Help', and a user profile dropdown for 'thirupathi@packapill.com'. Below the header, there is a search bar labeled 'Search name, mobile, email' and an 'Add Customer' button. The main content is a table with columns: Last Name, First Name, Mobile, Email, and Actions. The table lists four customers: Bagavathi Monisha, Doe John, Mark Timothy, and Merckel Robyn. For each customer, there are two buttons in the Actions column: 'Create Order' (highlighted with a yellow circle) and 'View Profile'. At the bottom of the table, there is a pagination indicator '1 - 4 of 4' and navigation arrows.
